

ALPHASTACK 7-DAY BUILDATHON · NIT TRICHY

PhoneMail

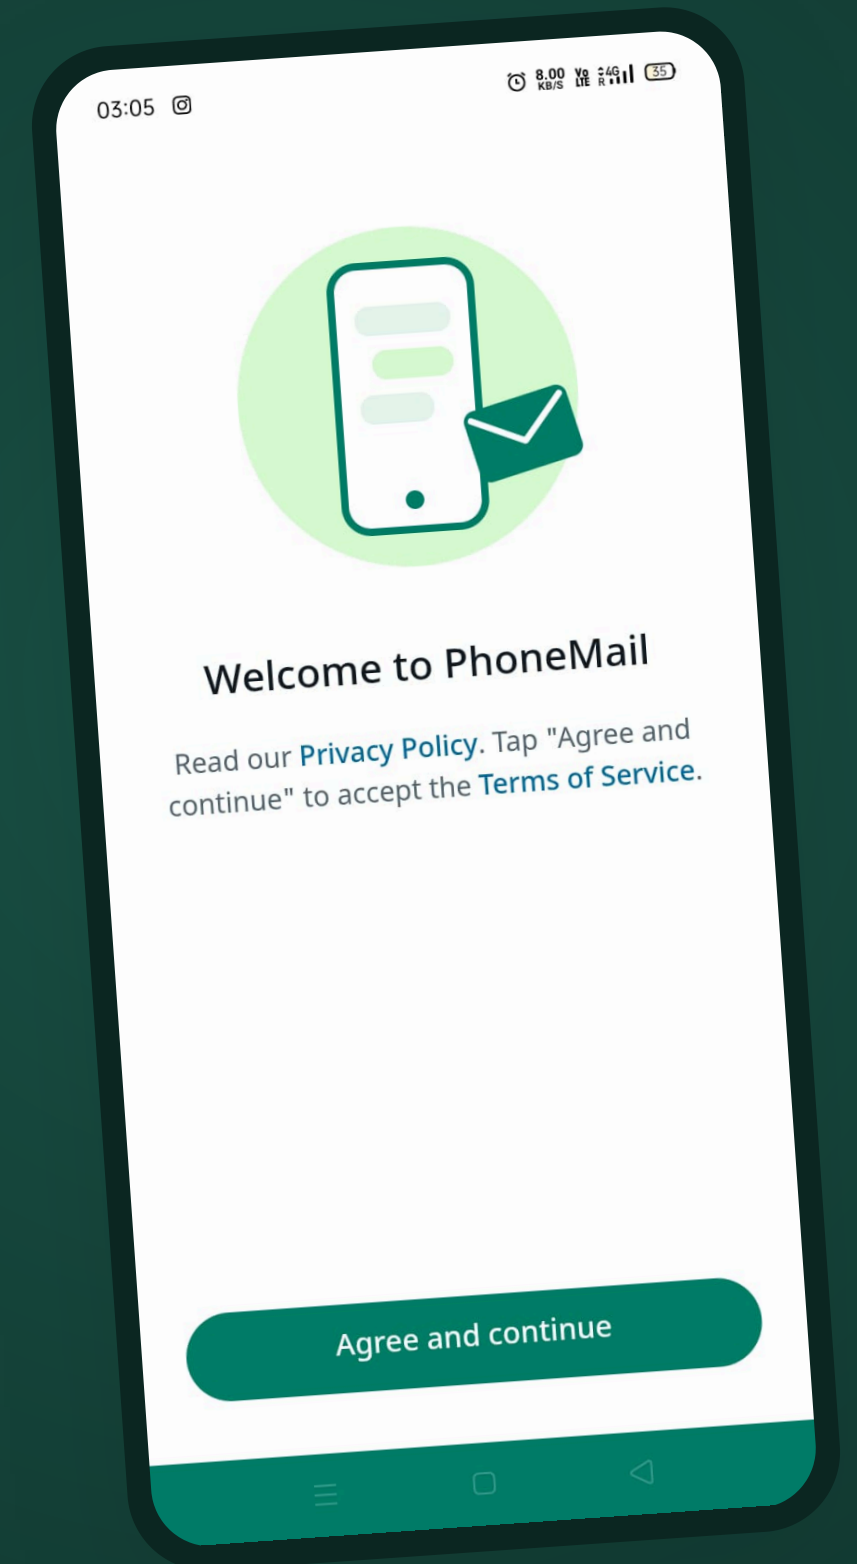

Email where your phone number is your address.

📞 98765 43210

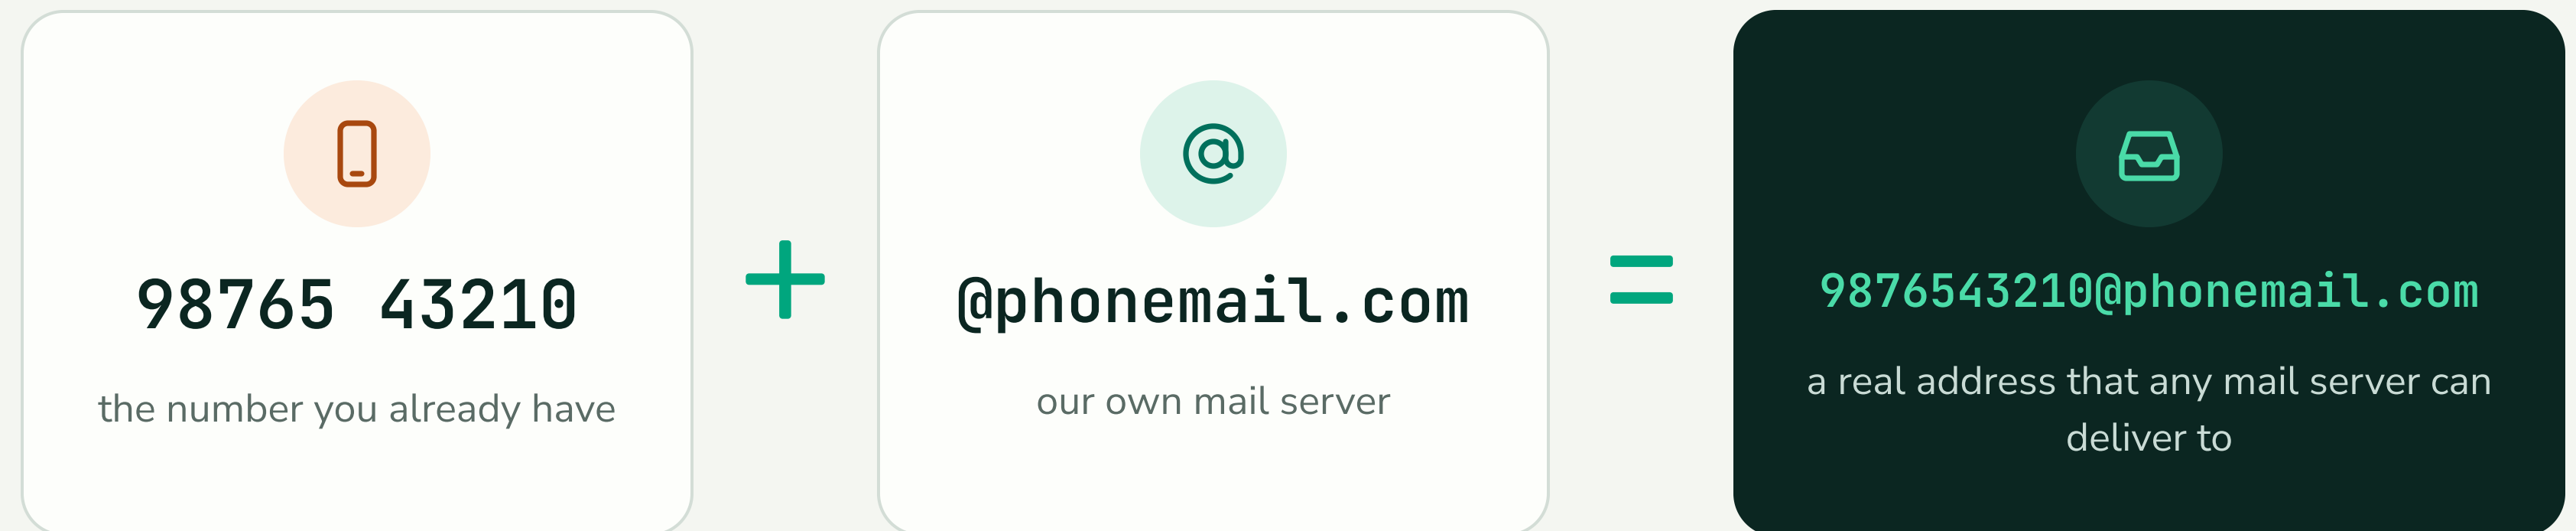

✉️ 9876543210@phonemail.com

Ashish Bharti

THE IDEA

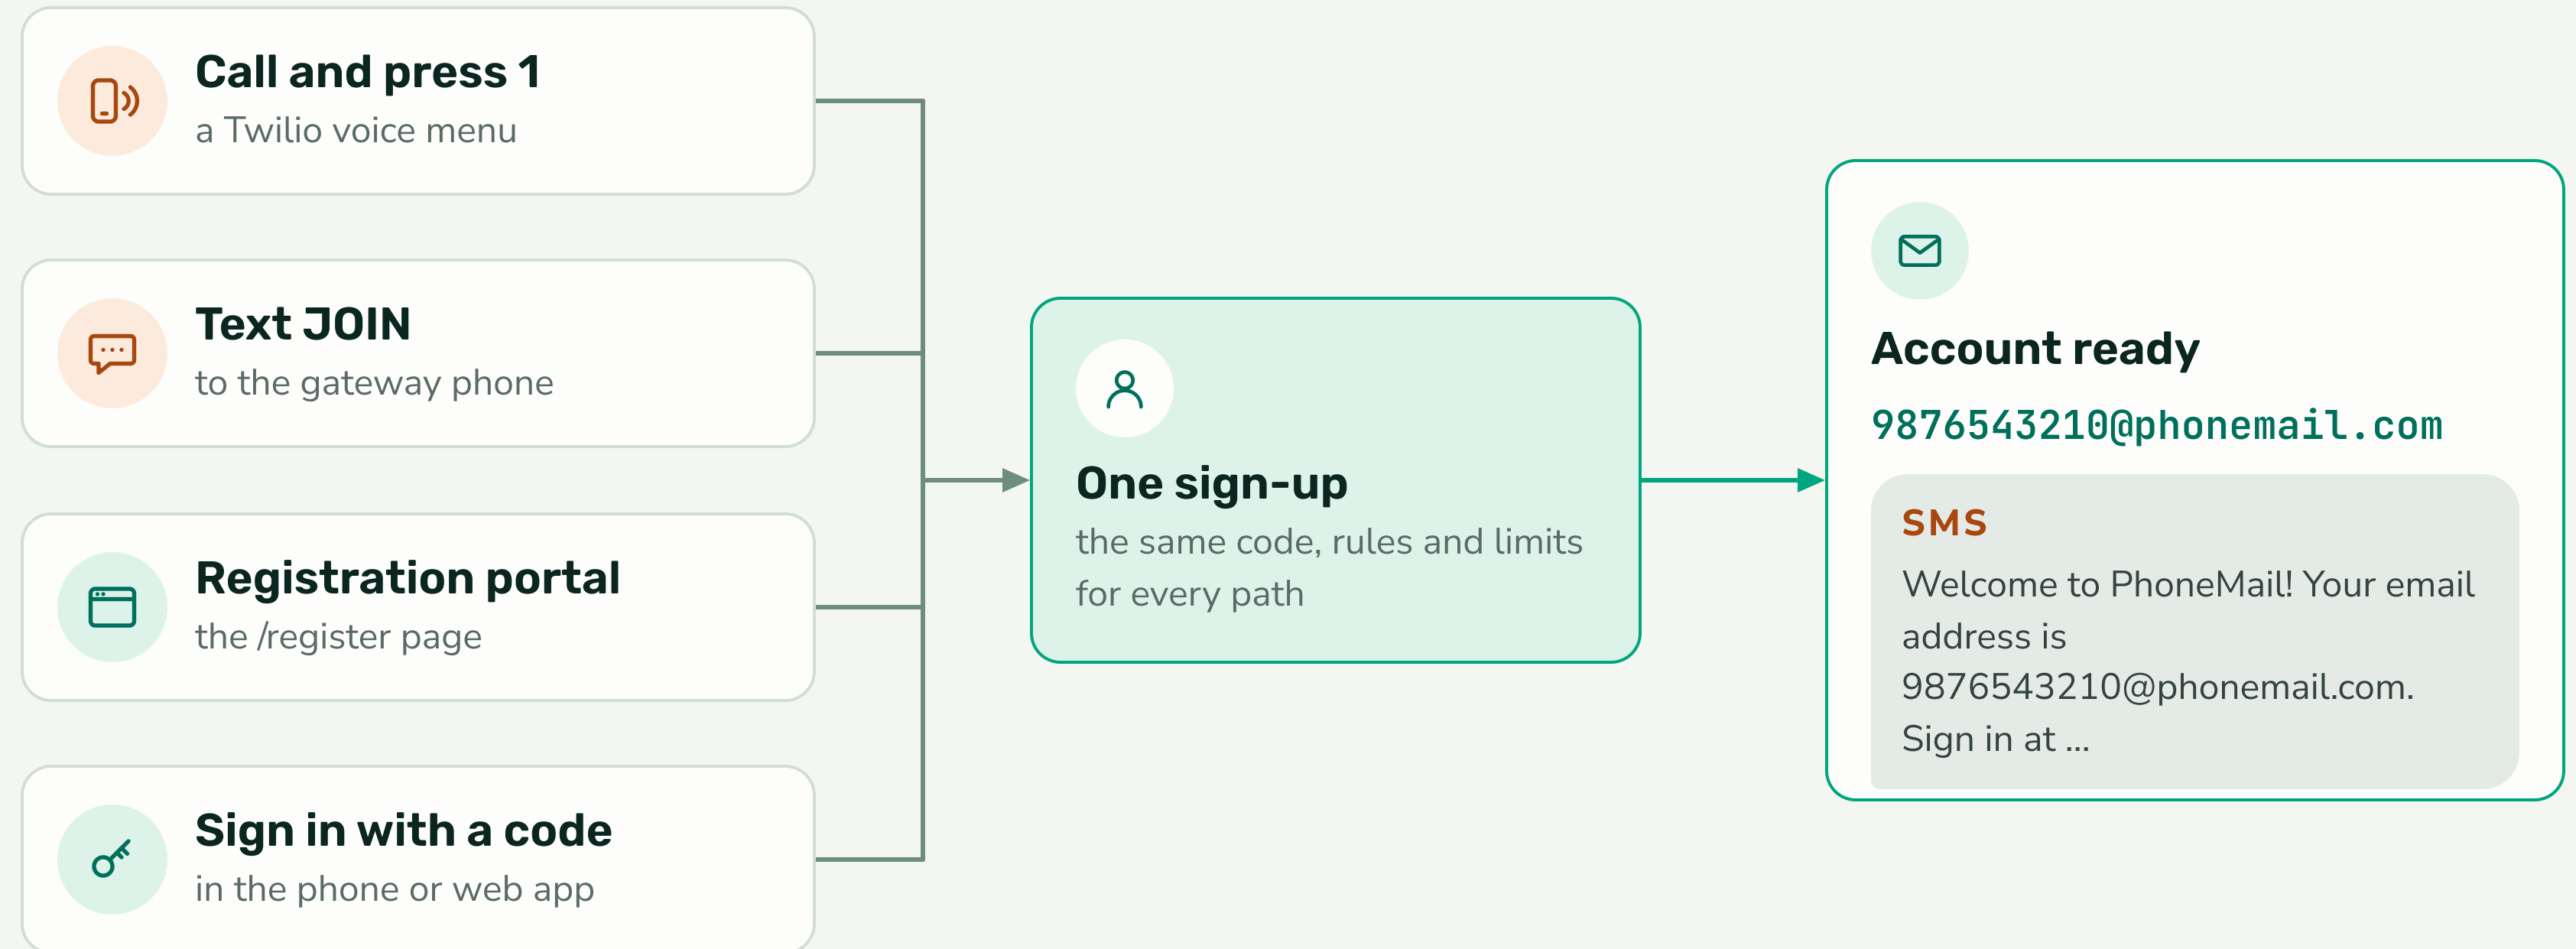

Your phone number becomes your email address

Nothing new to remember: you sign in with a one-time code sent to that number.

JOINING

Four ways in, one account

ON THE PHONE

WhatsApp-style chats

- 1

Swipe to reply

The reply quotes the email it answers; each email is answered once.
- 2

Ticks you know

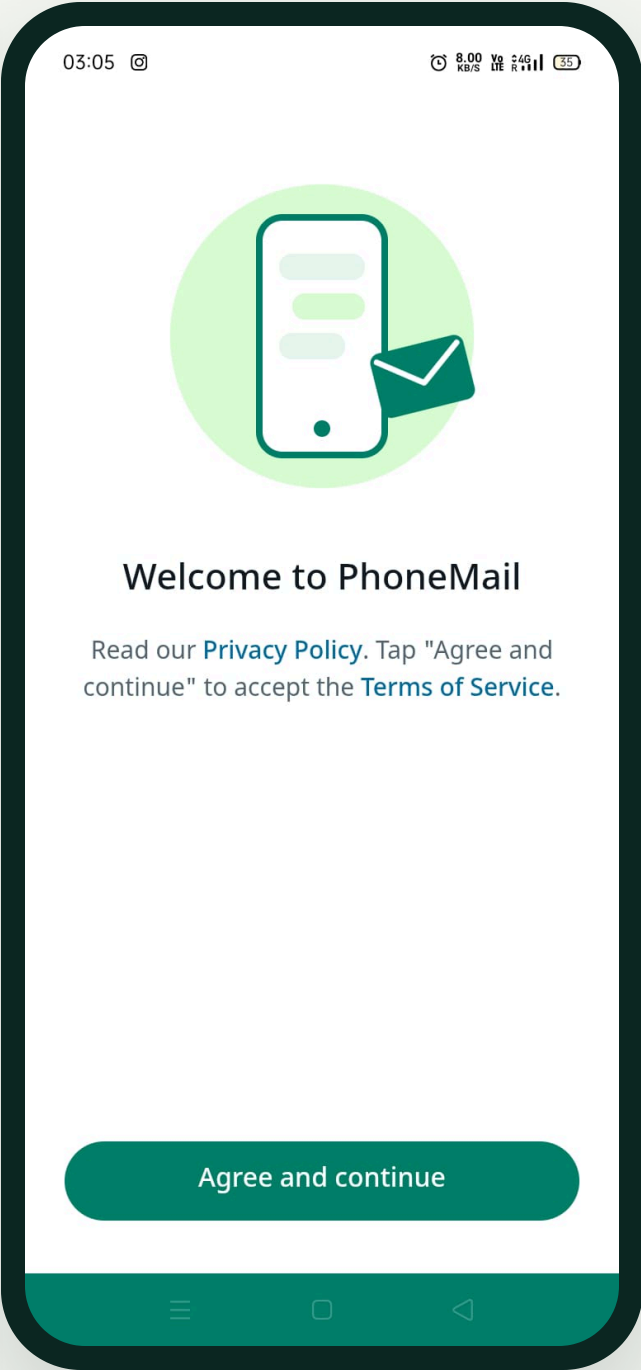

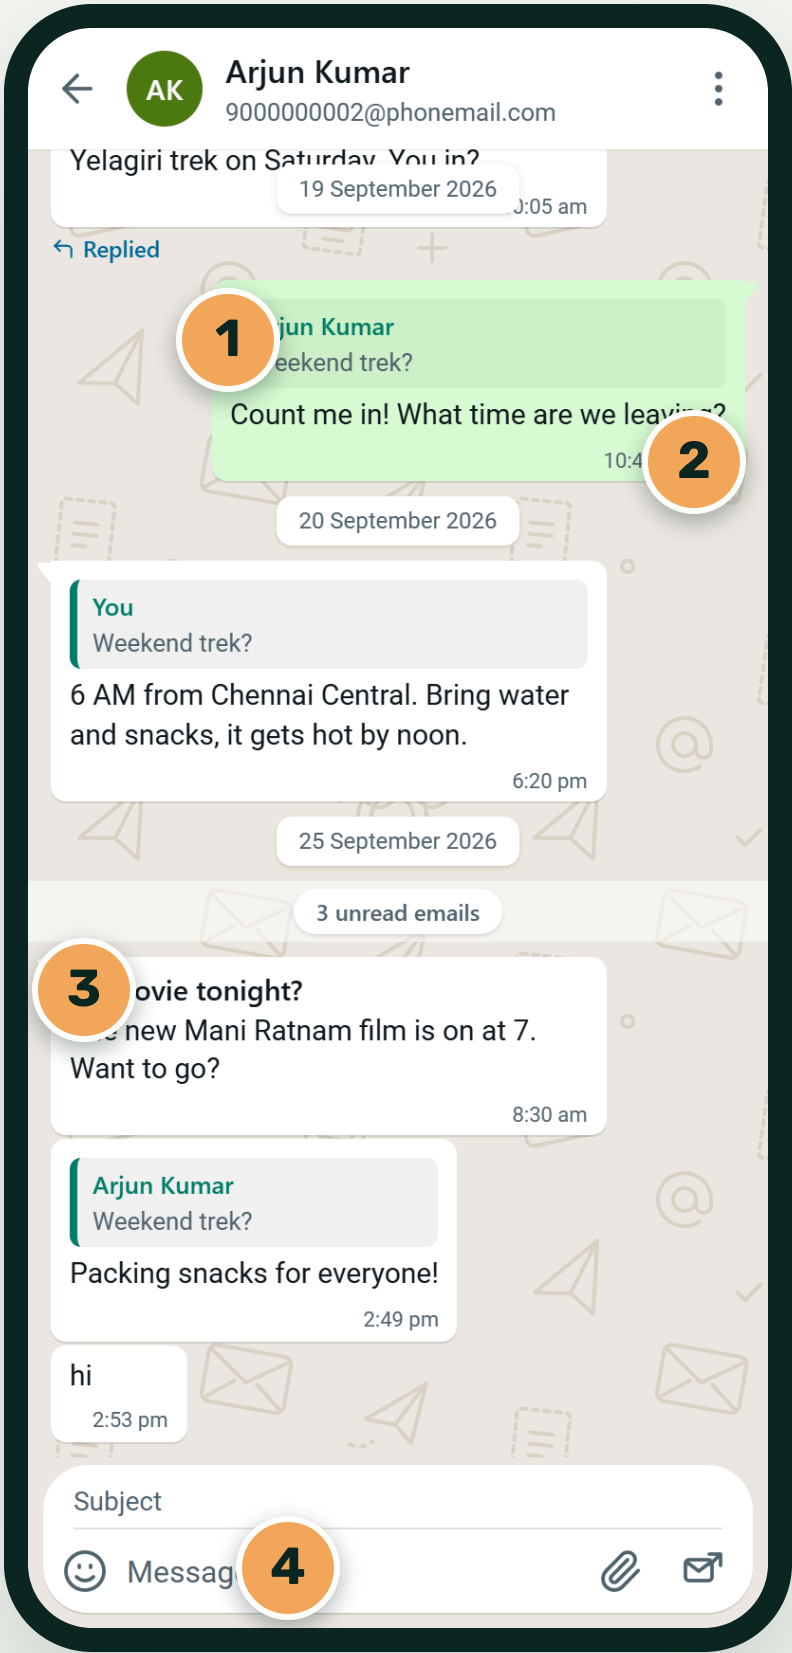

Sent, delivered, and blue when read.
- 3

Every bubble is an email

The subject sits on top, like a heading.
- 4

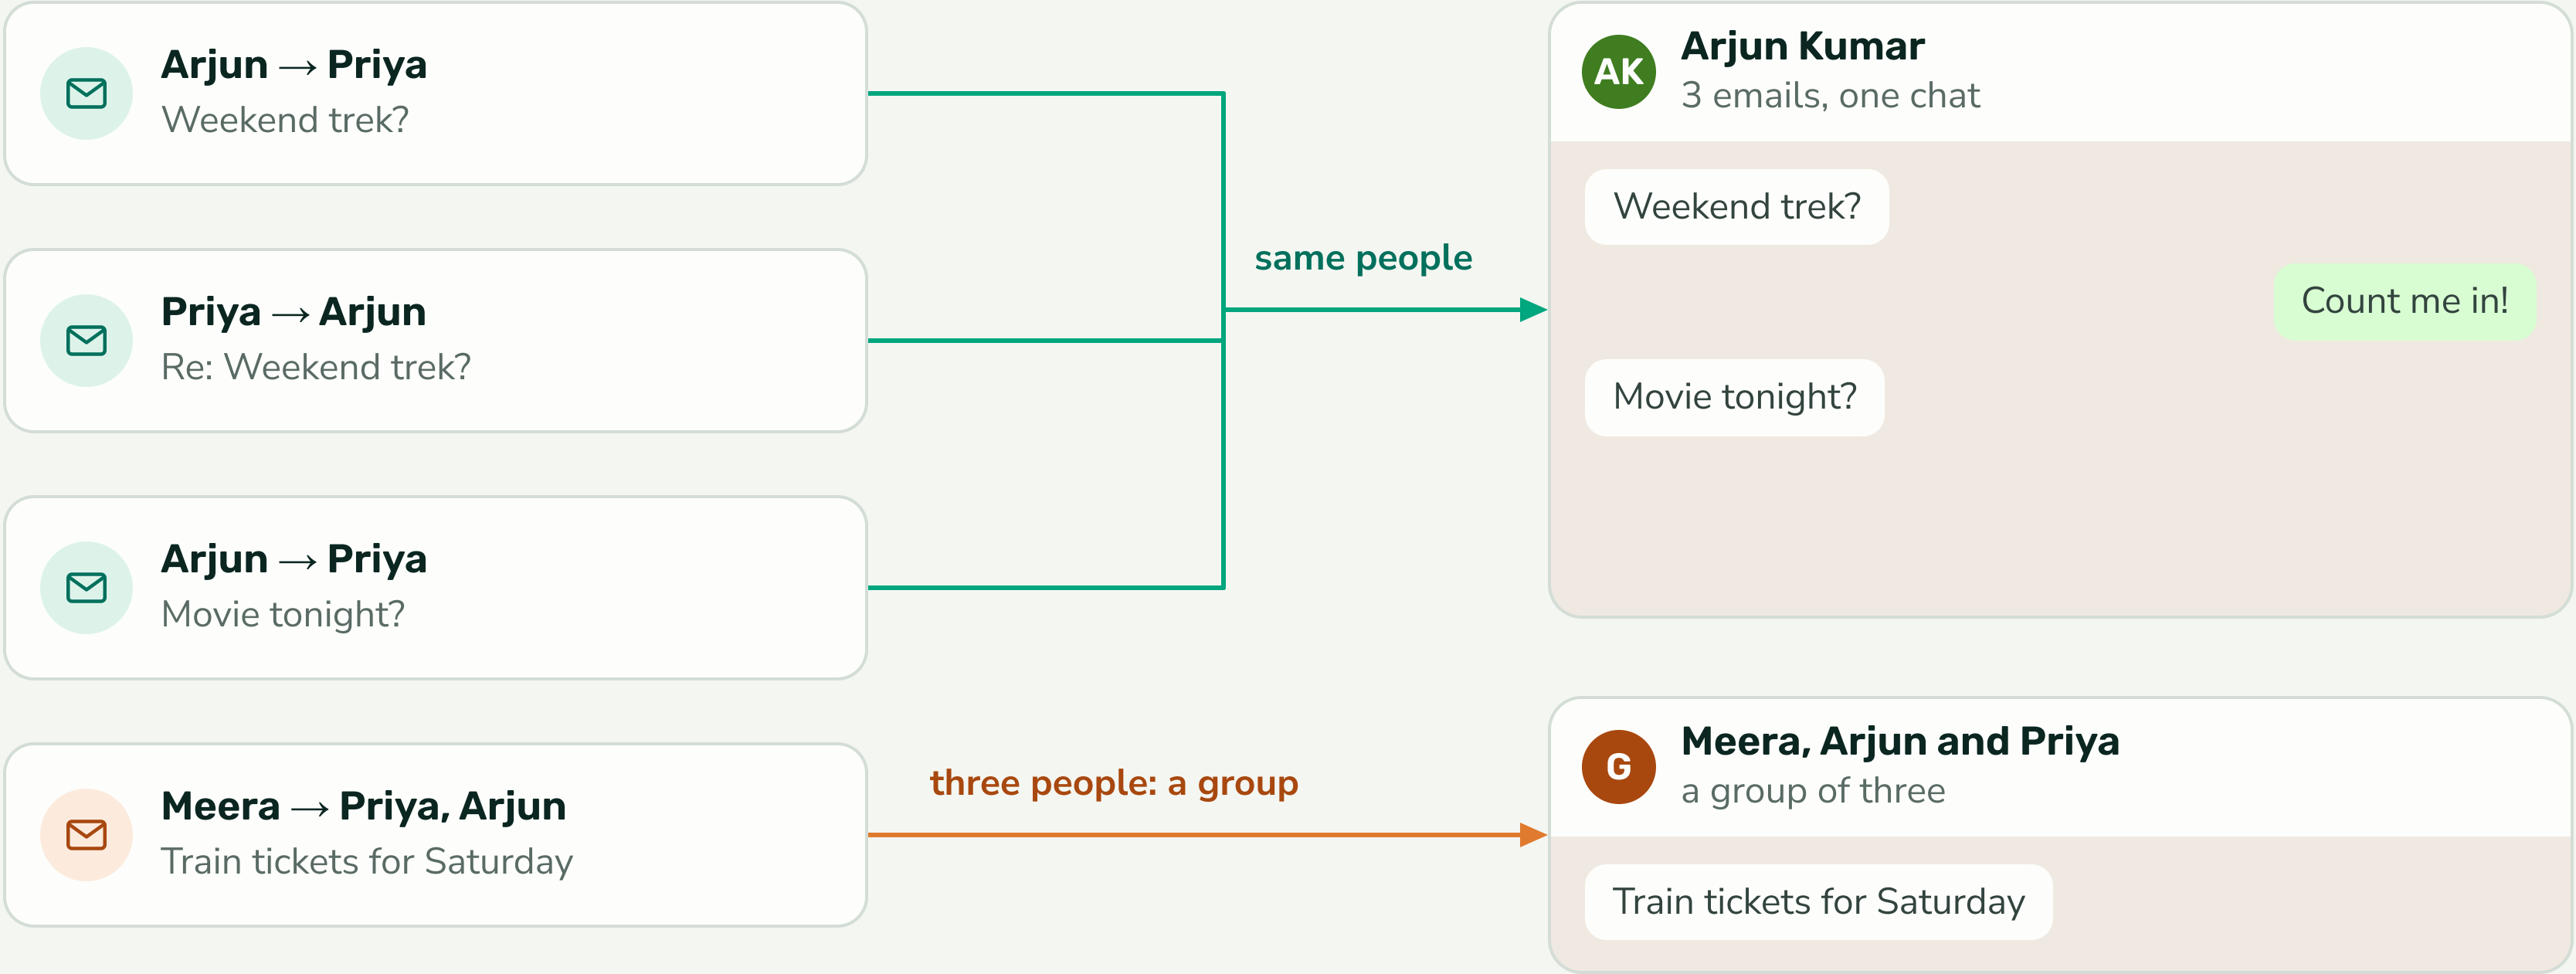

Write like a chat

Subject, message and attachments: it sends real email.

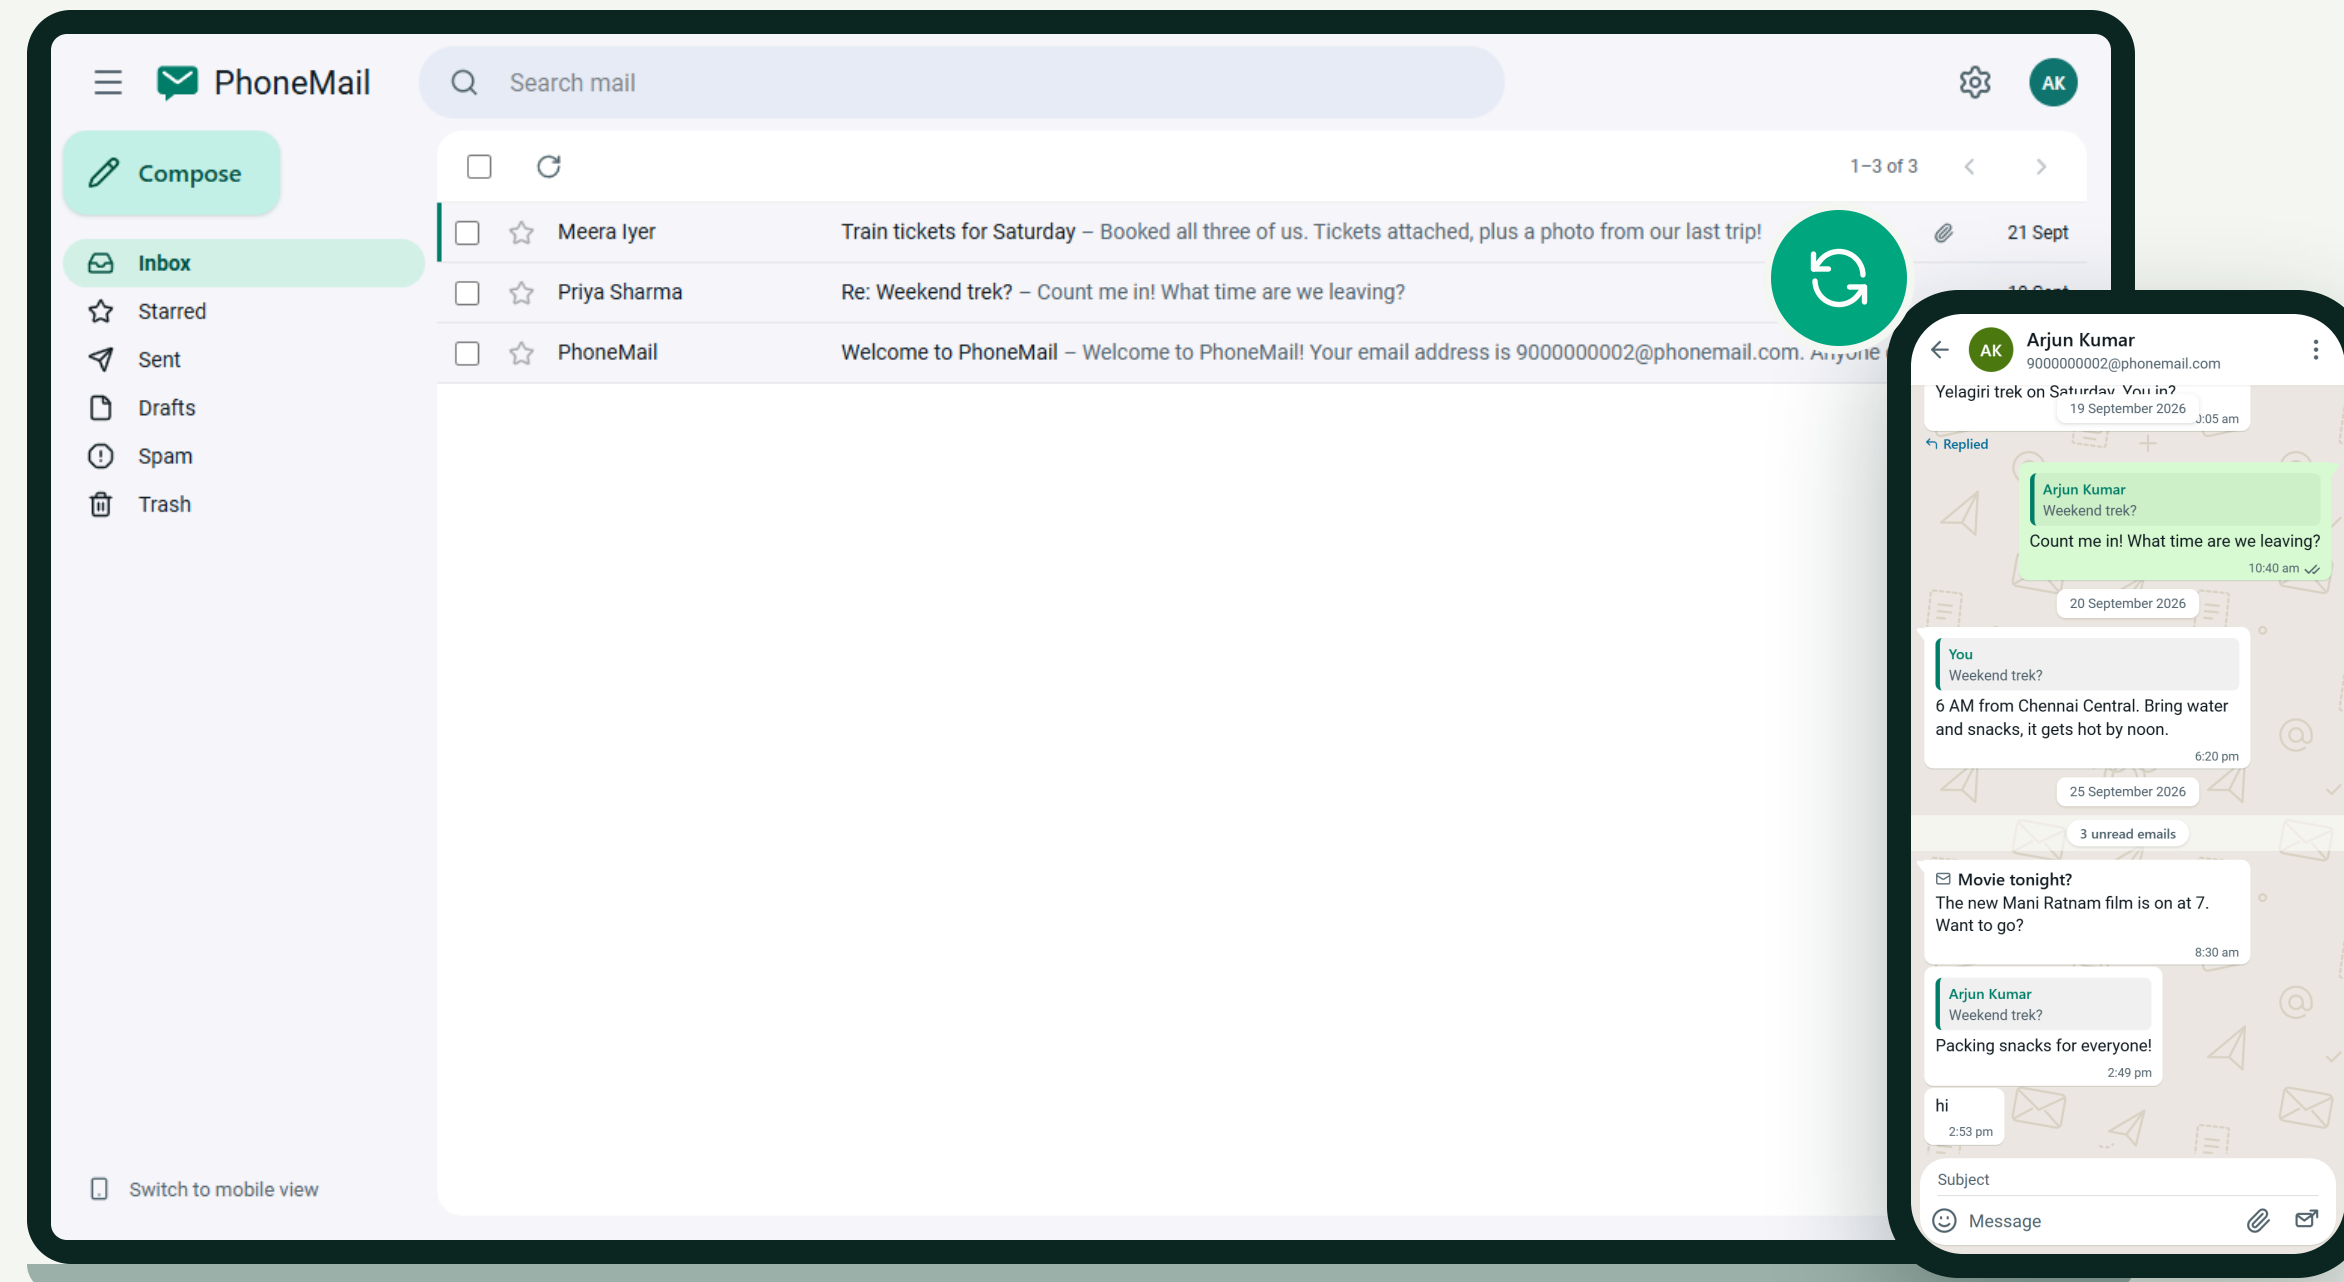

EMAILS BECOME CHATS

Same people, same chat

ON THE LAPTOP

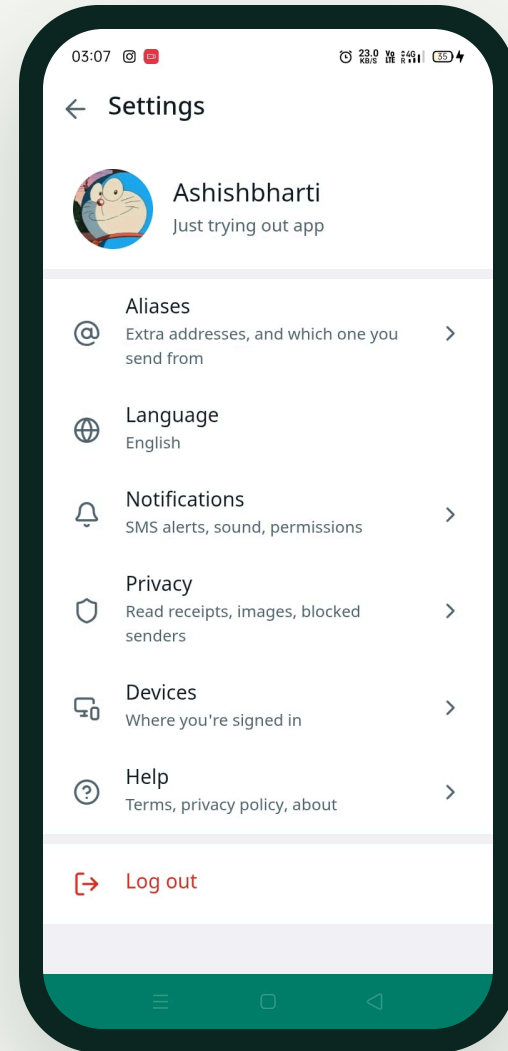

Gmail-style, over the same mailbox

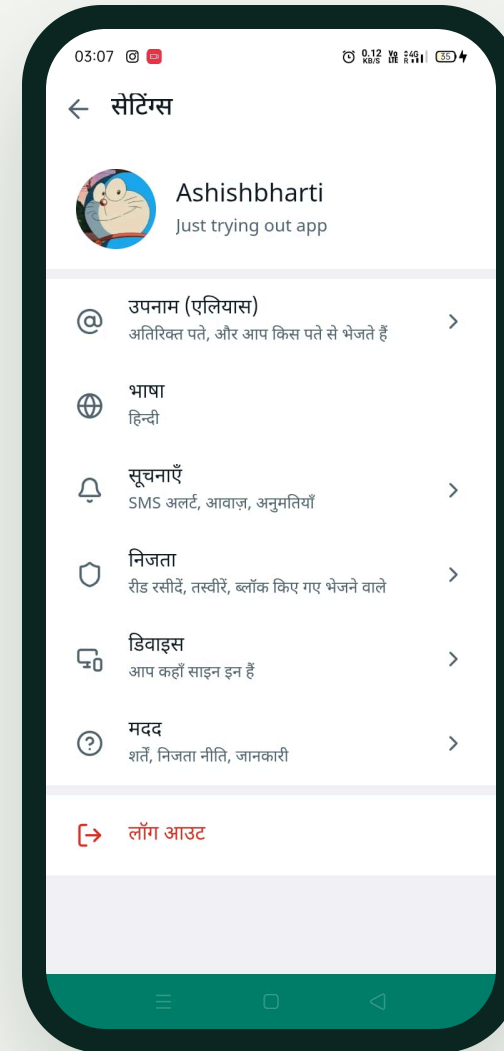

-  **One account**
Read, star or delete on one; it shows on the other.
-  **Live**
Socket.IO pushes each change the moment it happens.
-  **Gmail habits**
Folders, floating compose, keyboard shortcuts (press ?).

FOR INDIA

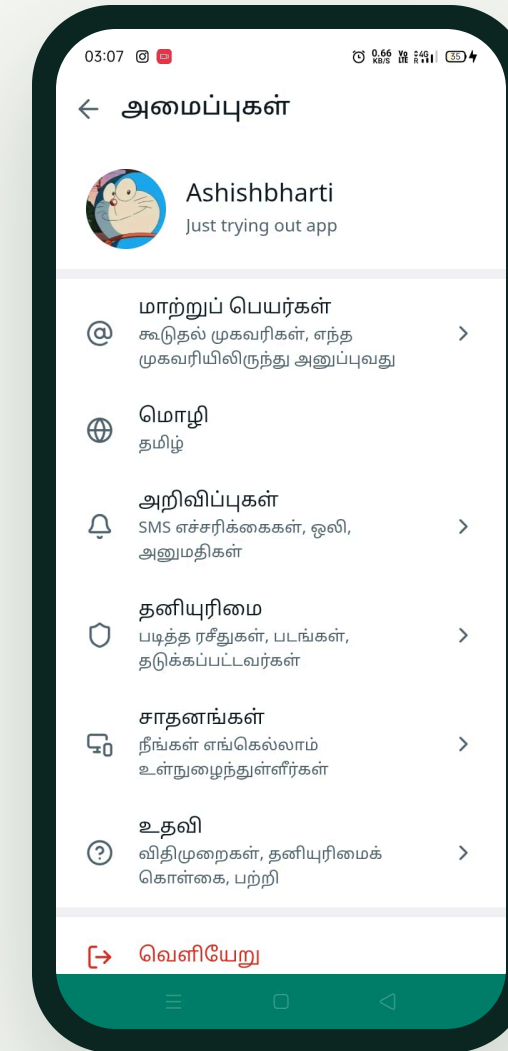

English, Hindi and Tamil, on every screen

English

हिन्दी

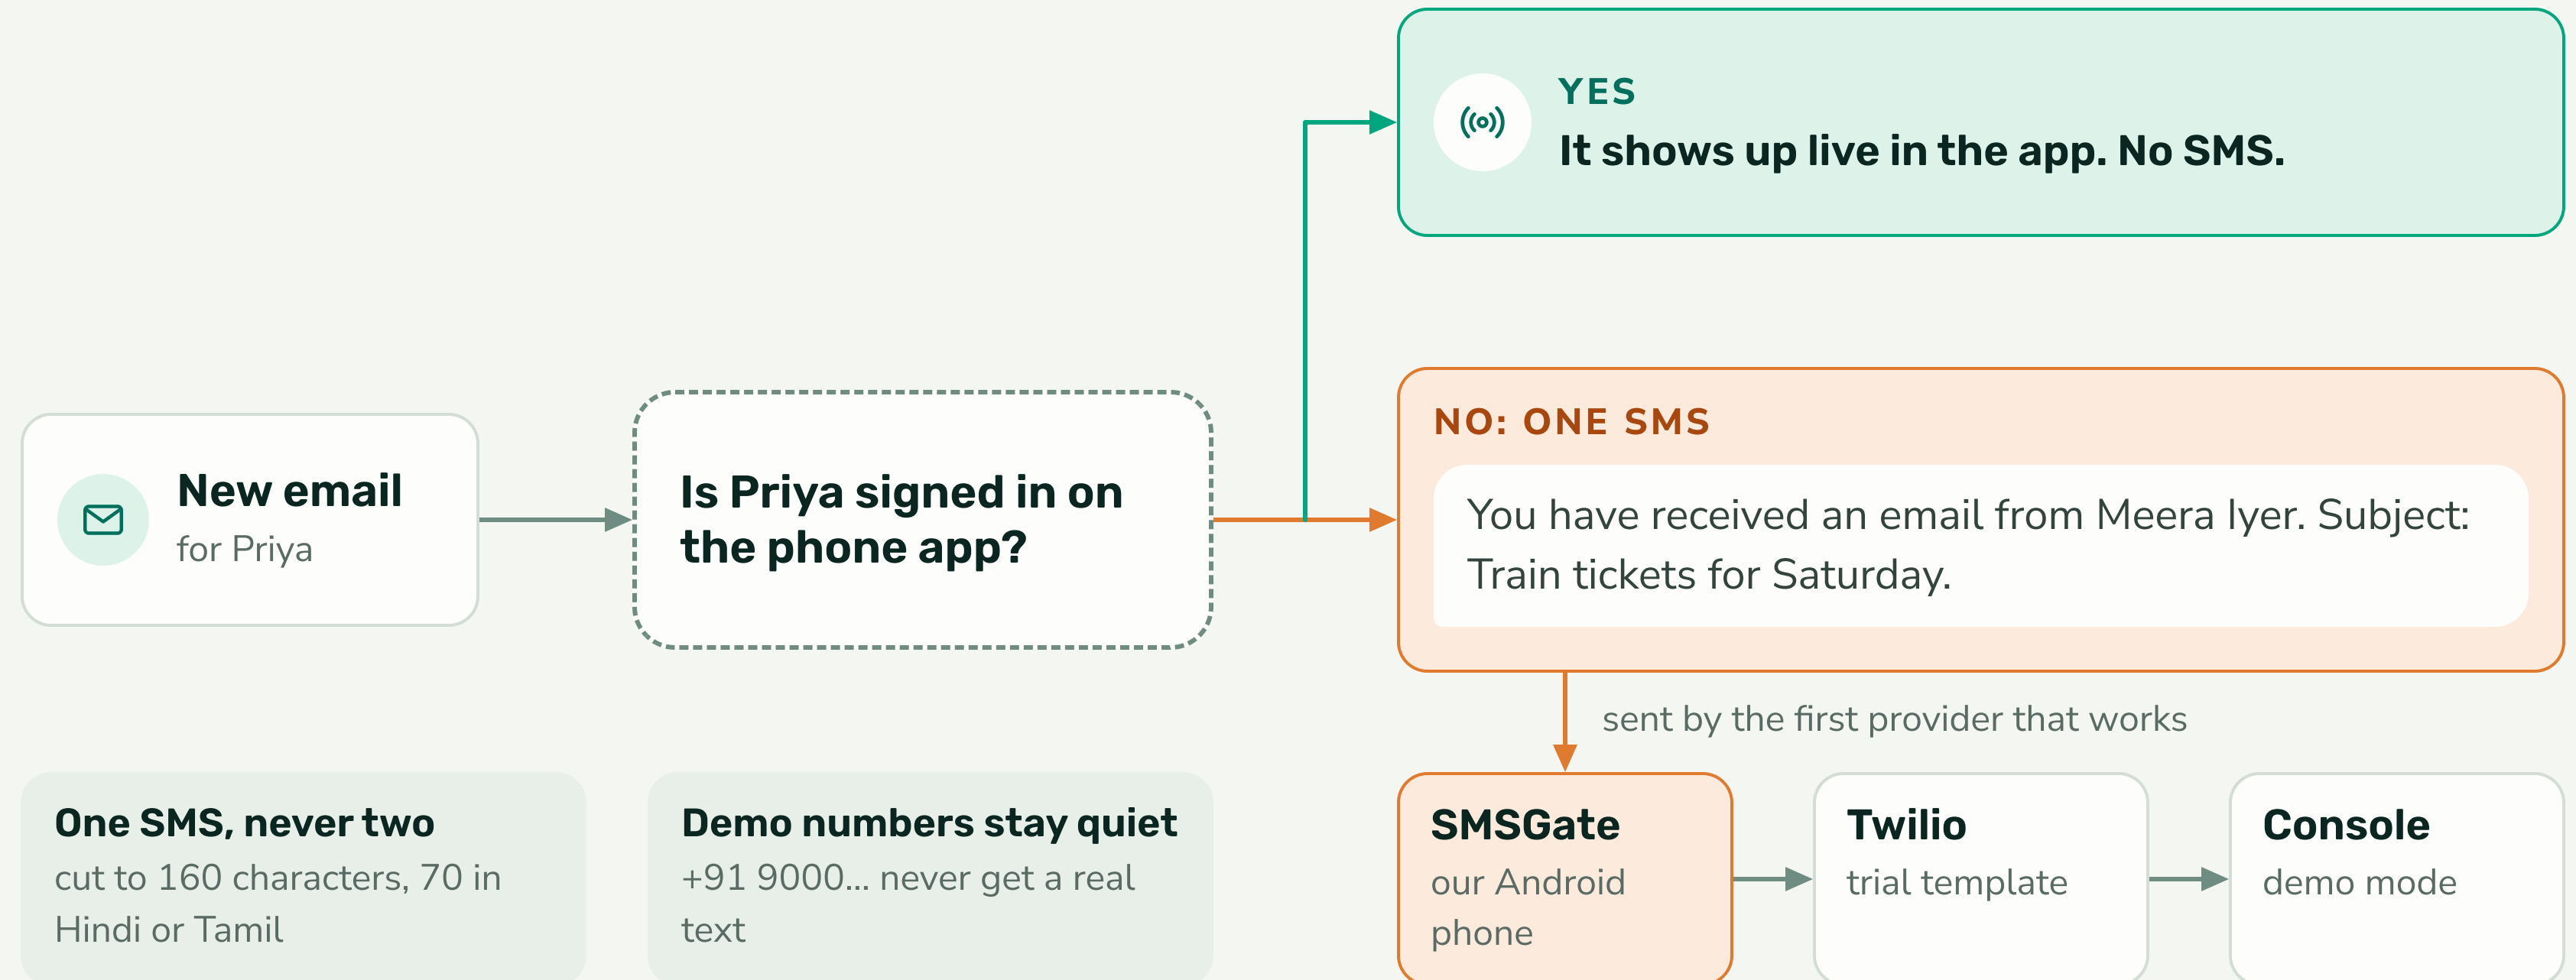

தமிழ்

Every word on screen comes from a translation file, so a new language is one more file.

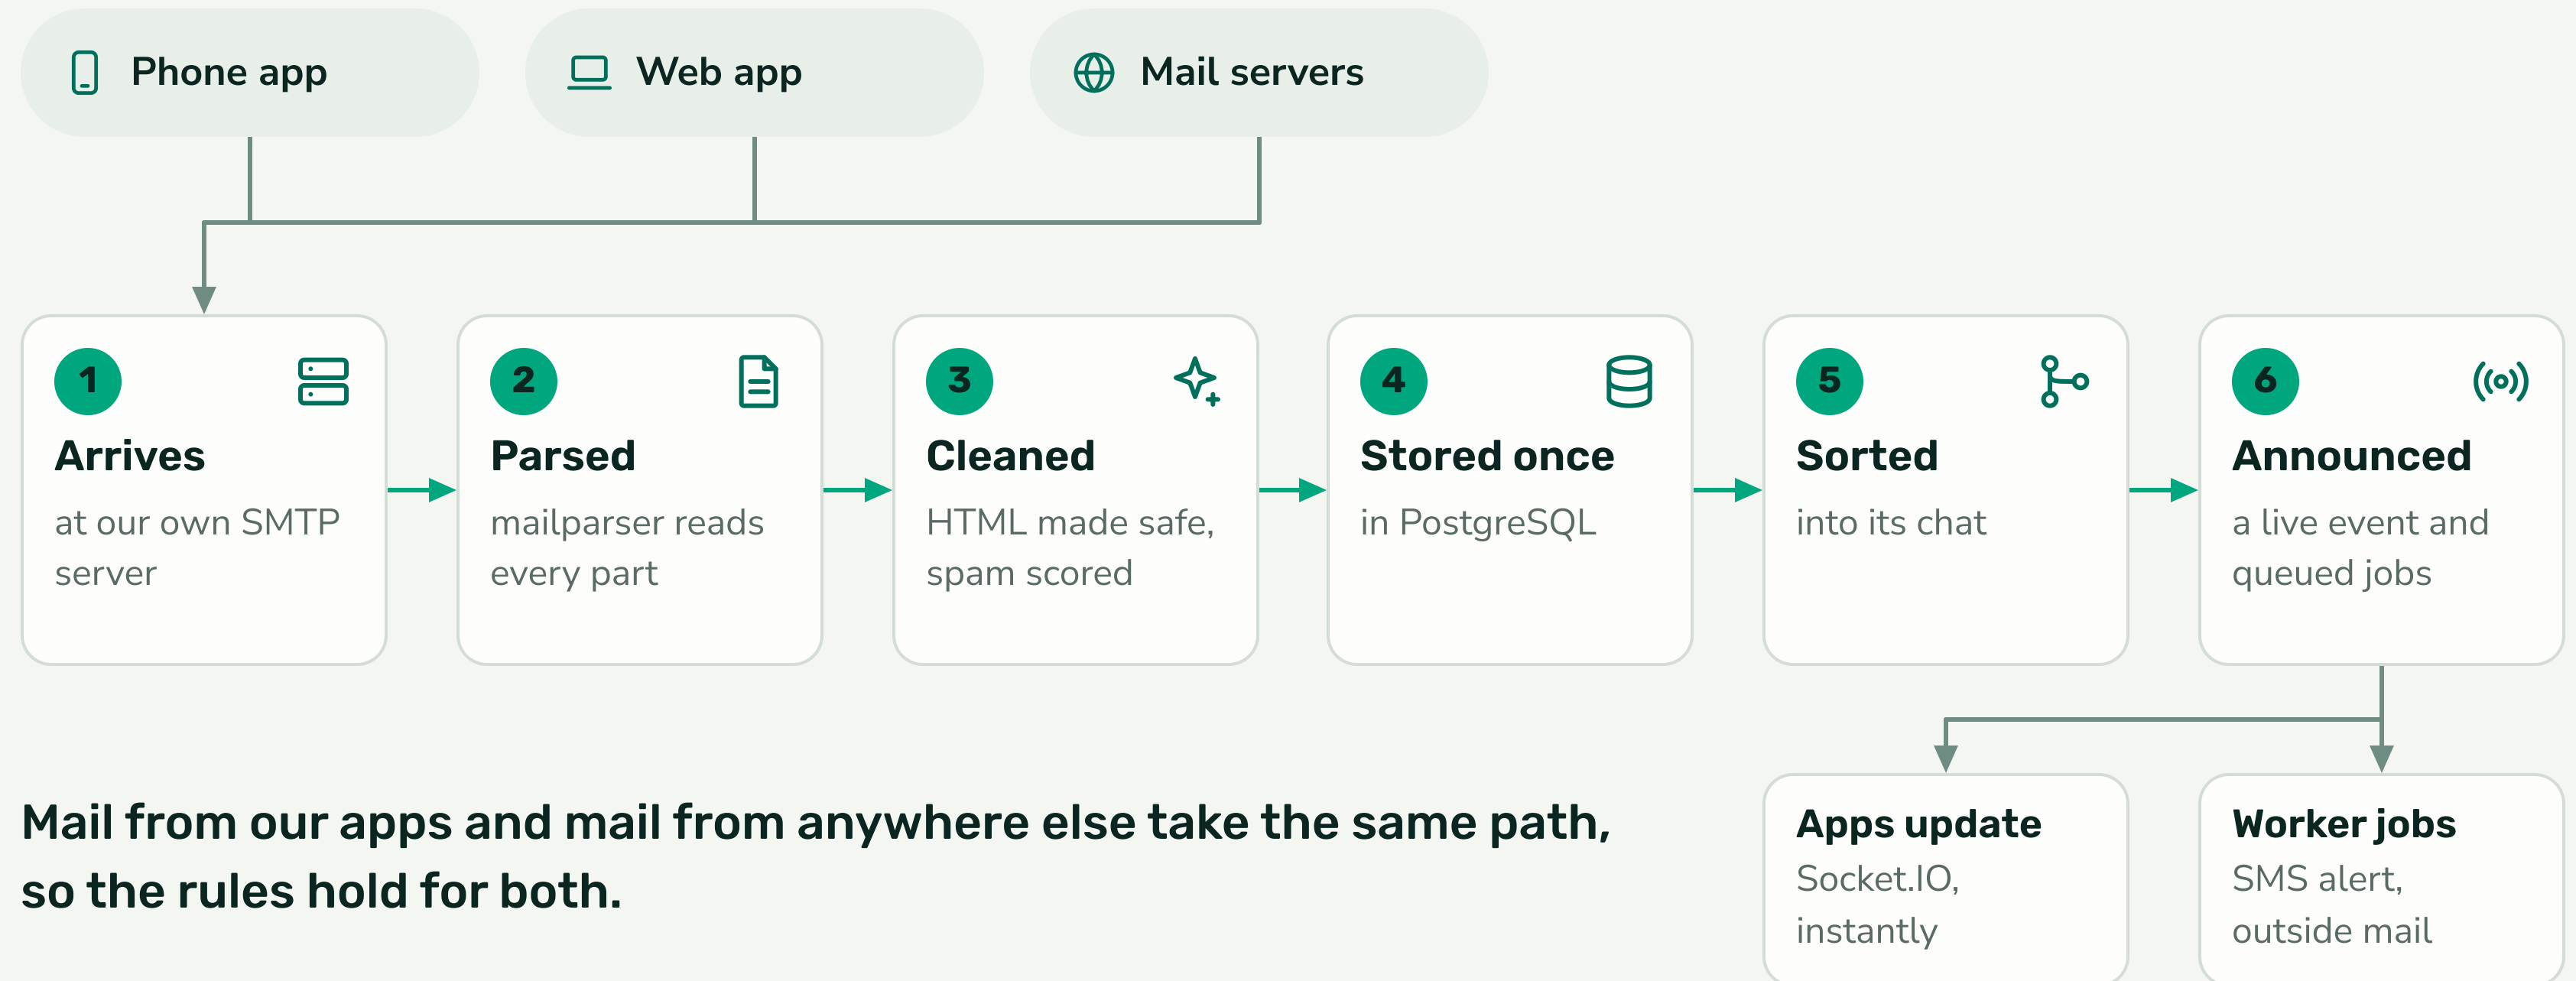

SMS ALERTS

A text only when it helps

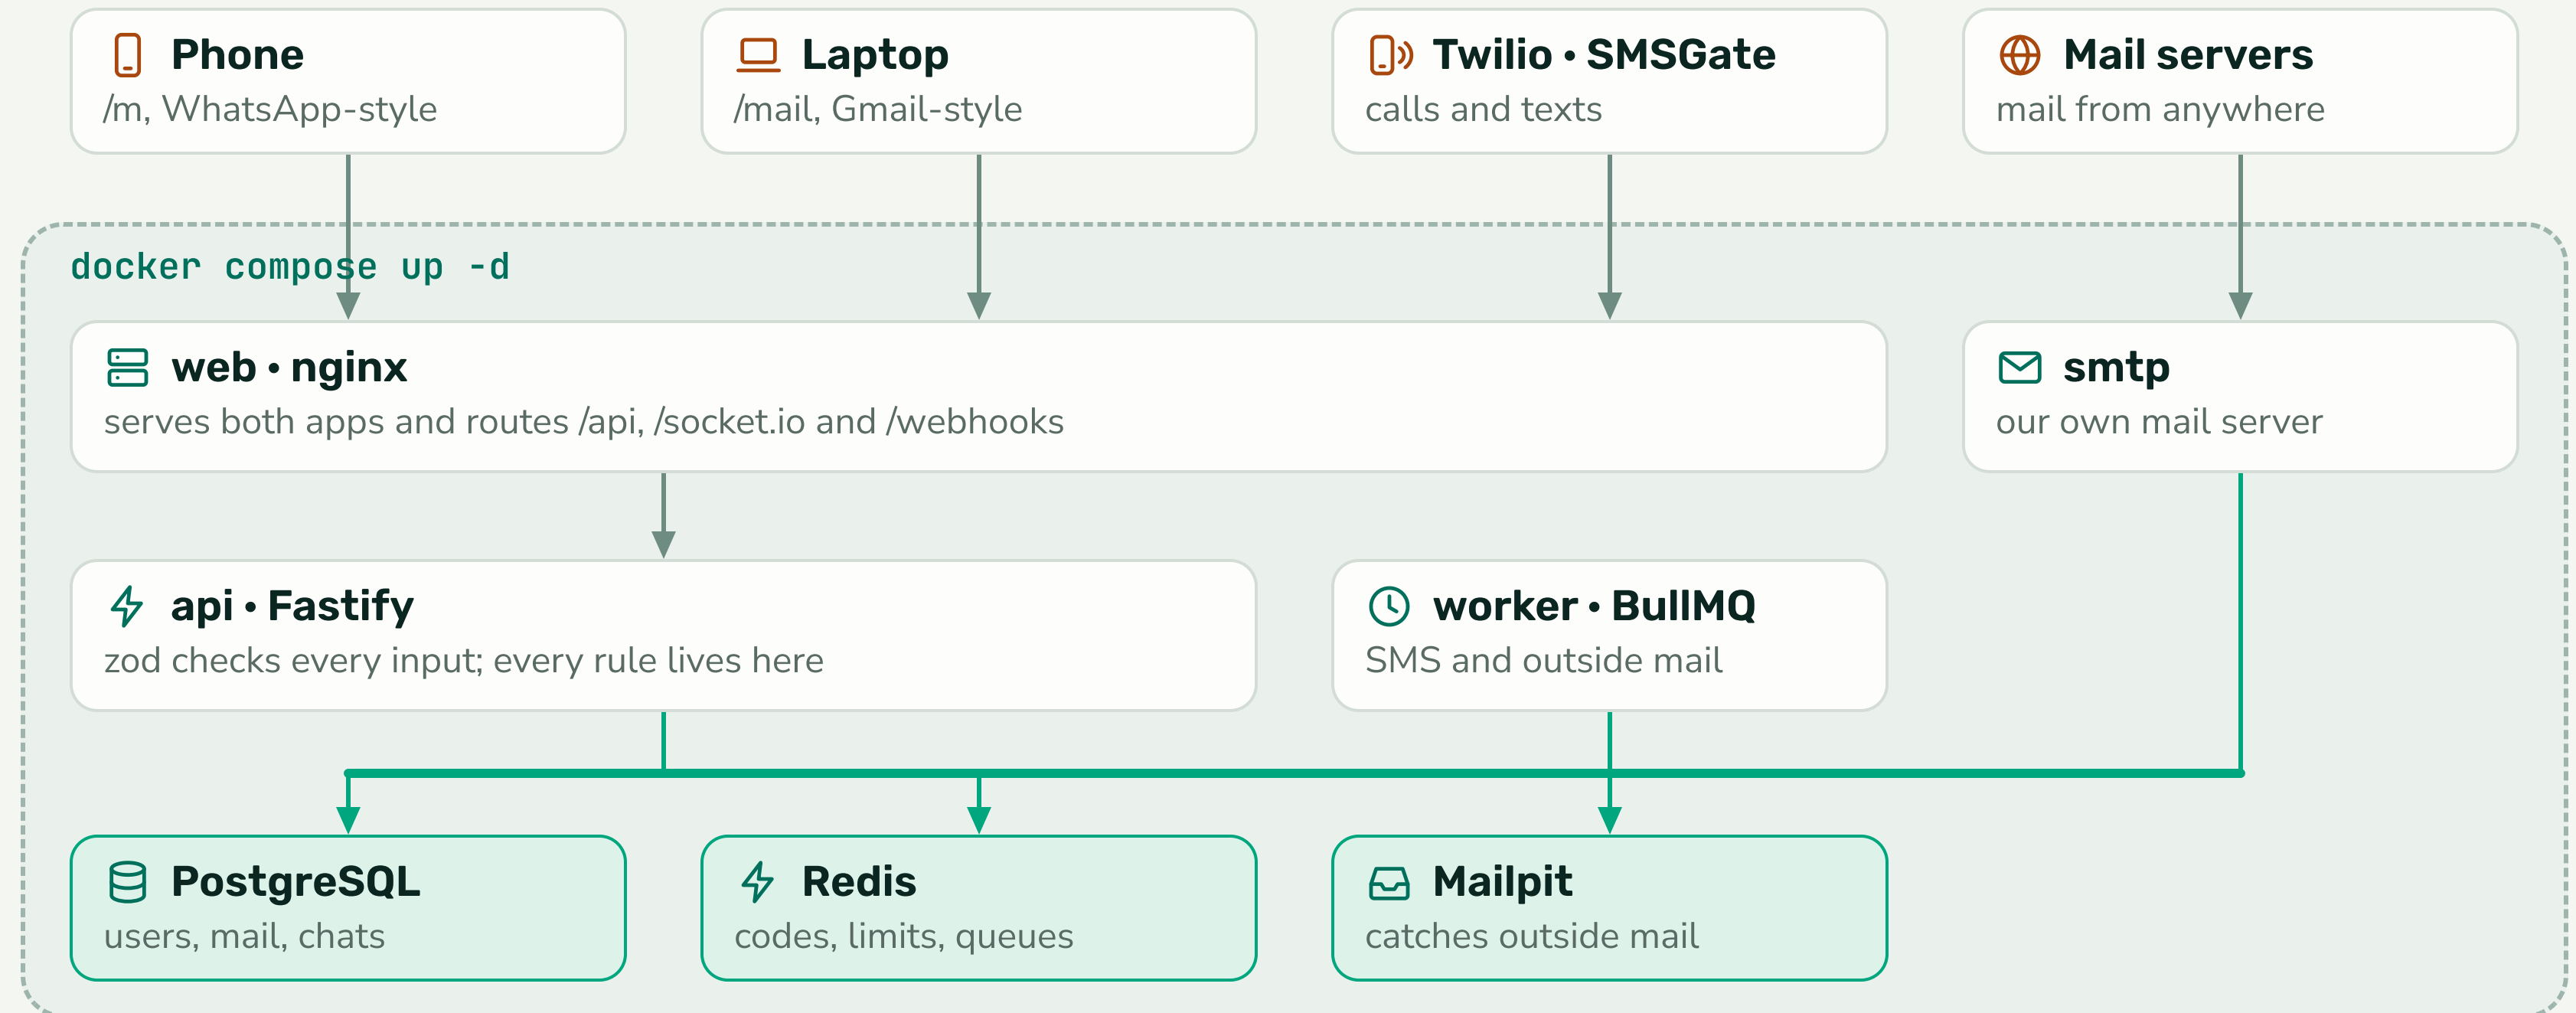

INSIDE THE SERVER

The life of an email

ARCHITECTURE

Everything in Docker, one command

RULES AND SAFETY

Enforced by the server, not the app

✓ Rules

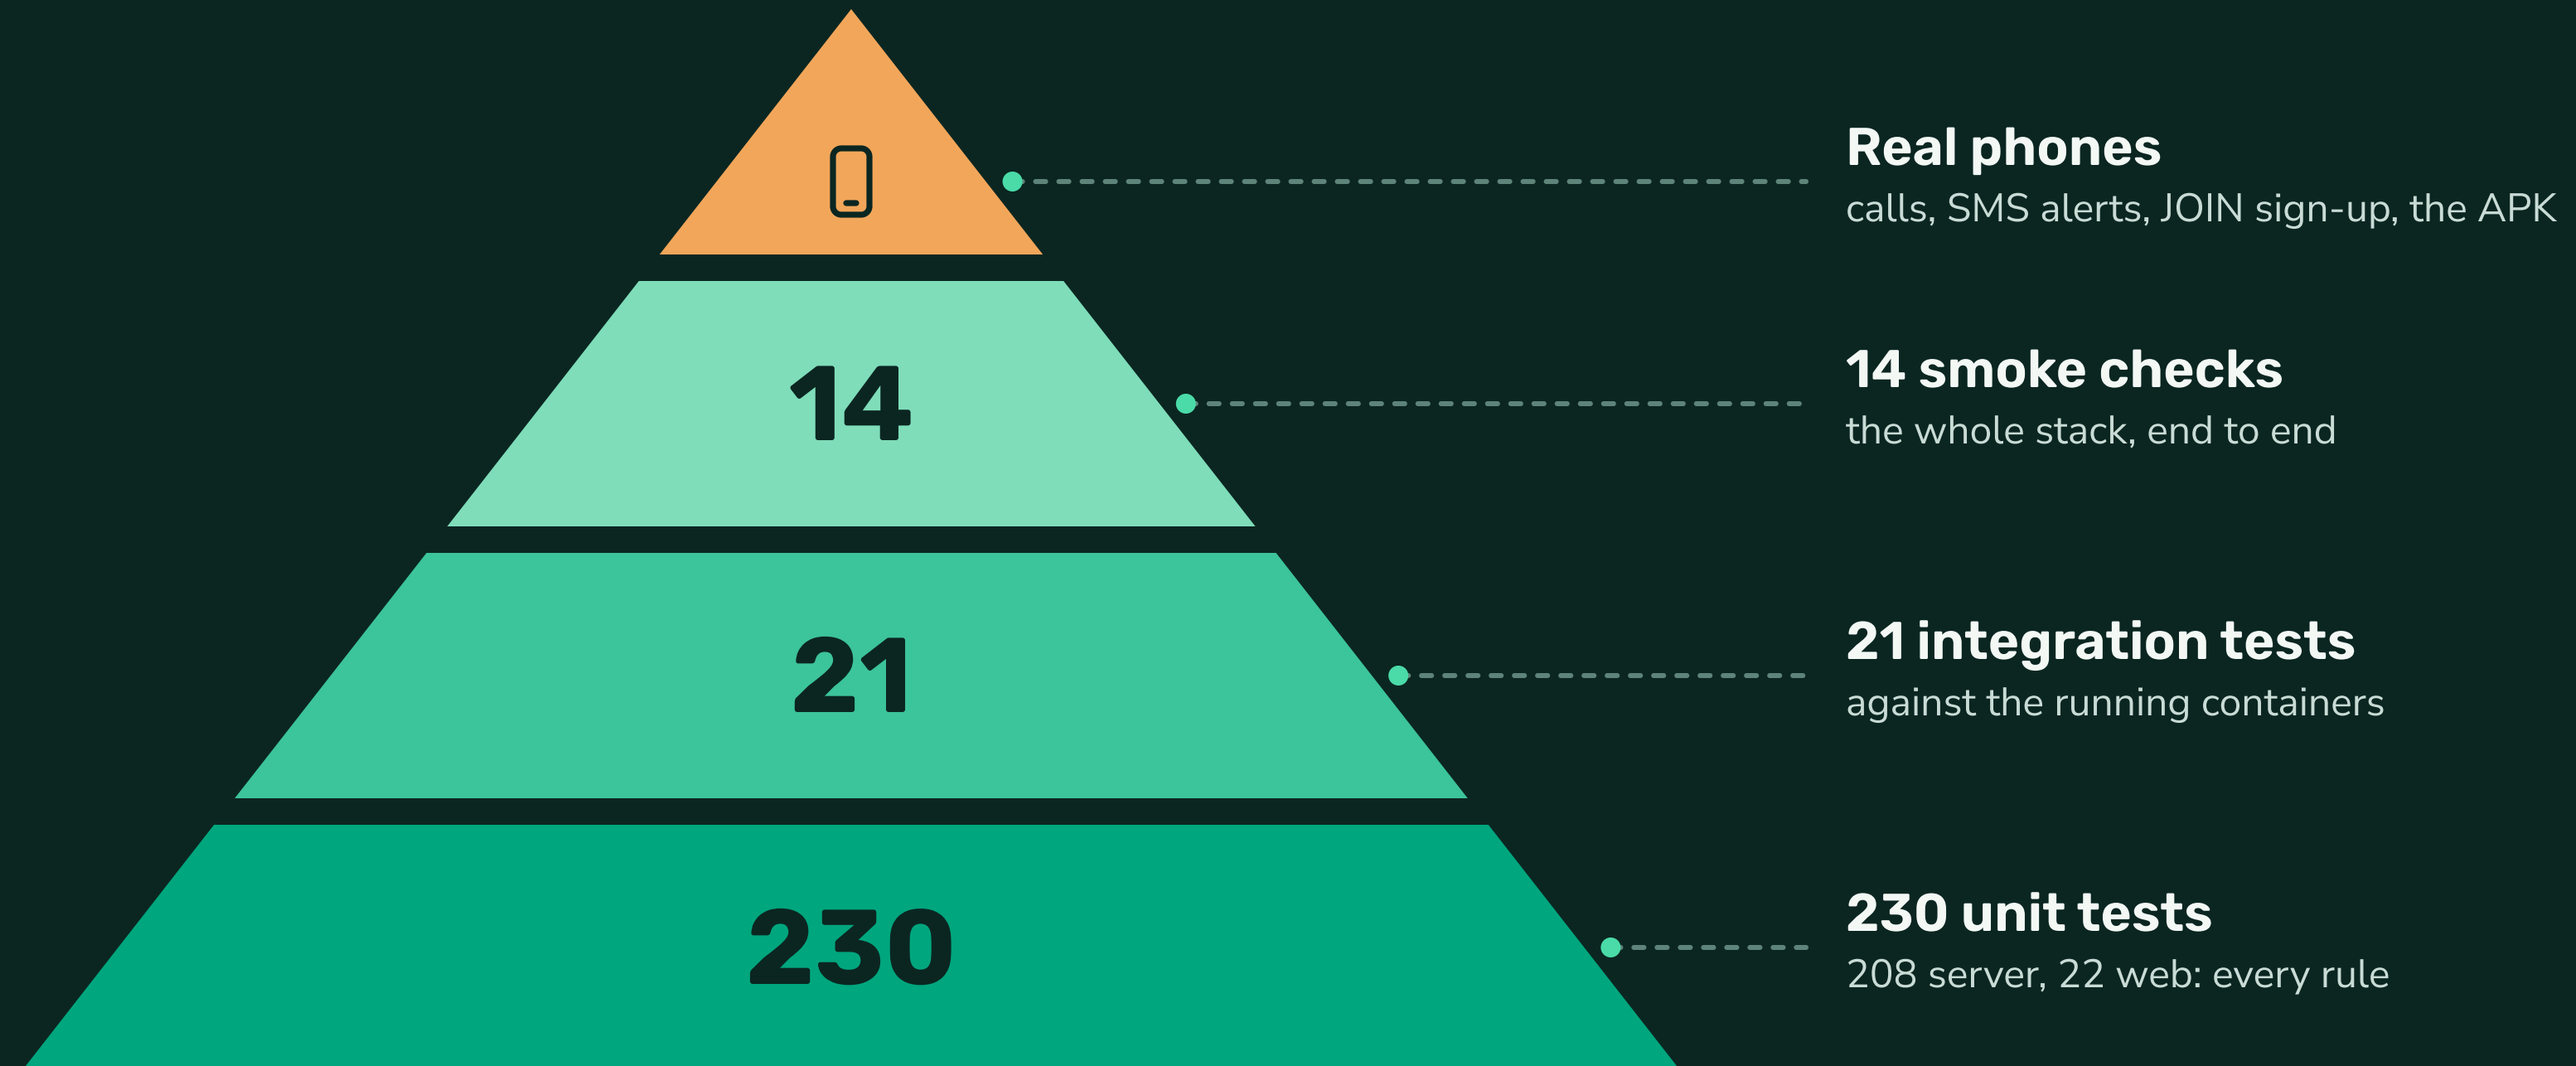

- ↩ Reply once to each email
- 🔒 Recipients fixed inside a chat
- 💬 SMS only without the mobile app
- 🔄 30 emails a minute per person
- 🏷 Alias names checked, held 30 days

✓ Safety

- # Codes stored as keyed hashes, with limits
- 🔄 Rotating sign-in tokens, CSRF protection
- 🛡 Email HTML cleaned and sandboxed
- 🚫 No open relay; signed webhooks
- <> Every input checked with zod

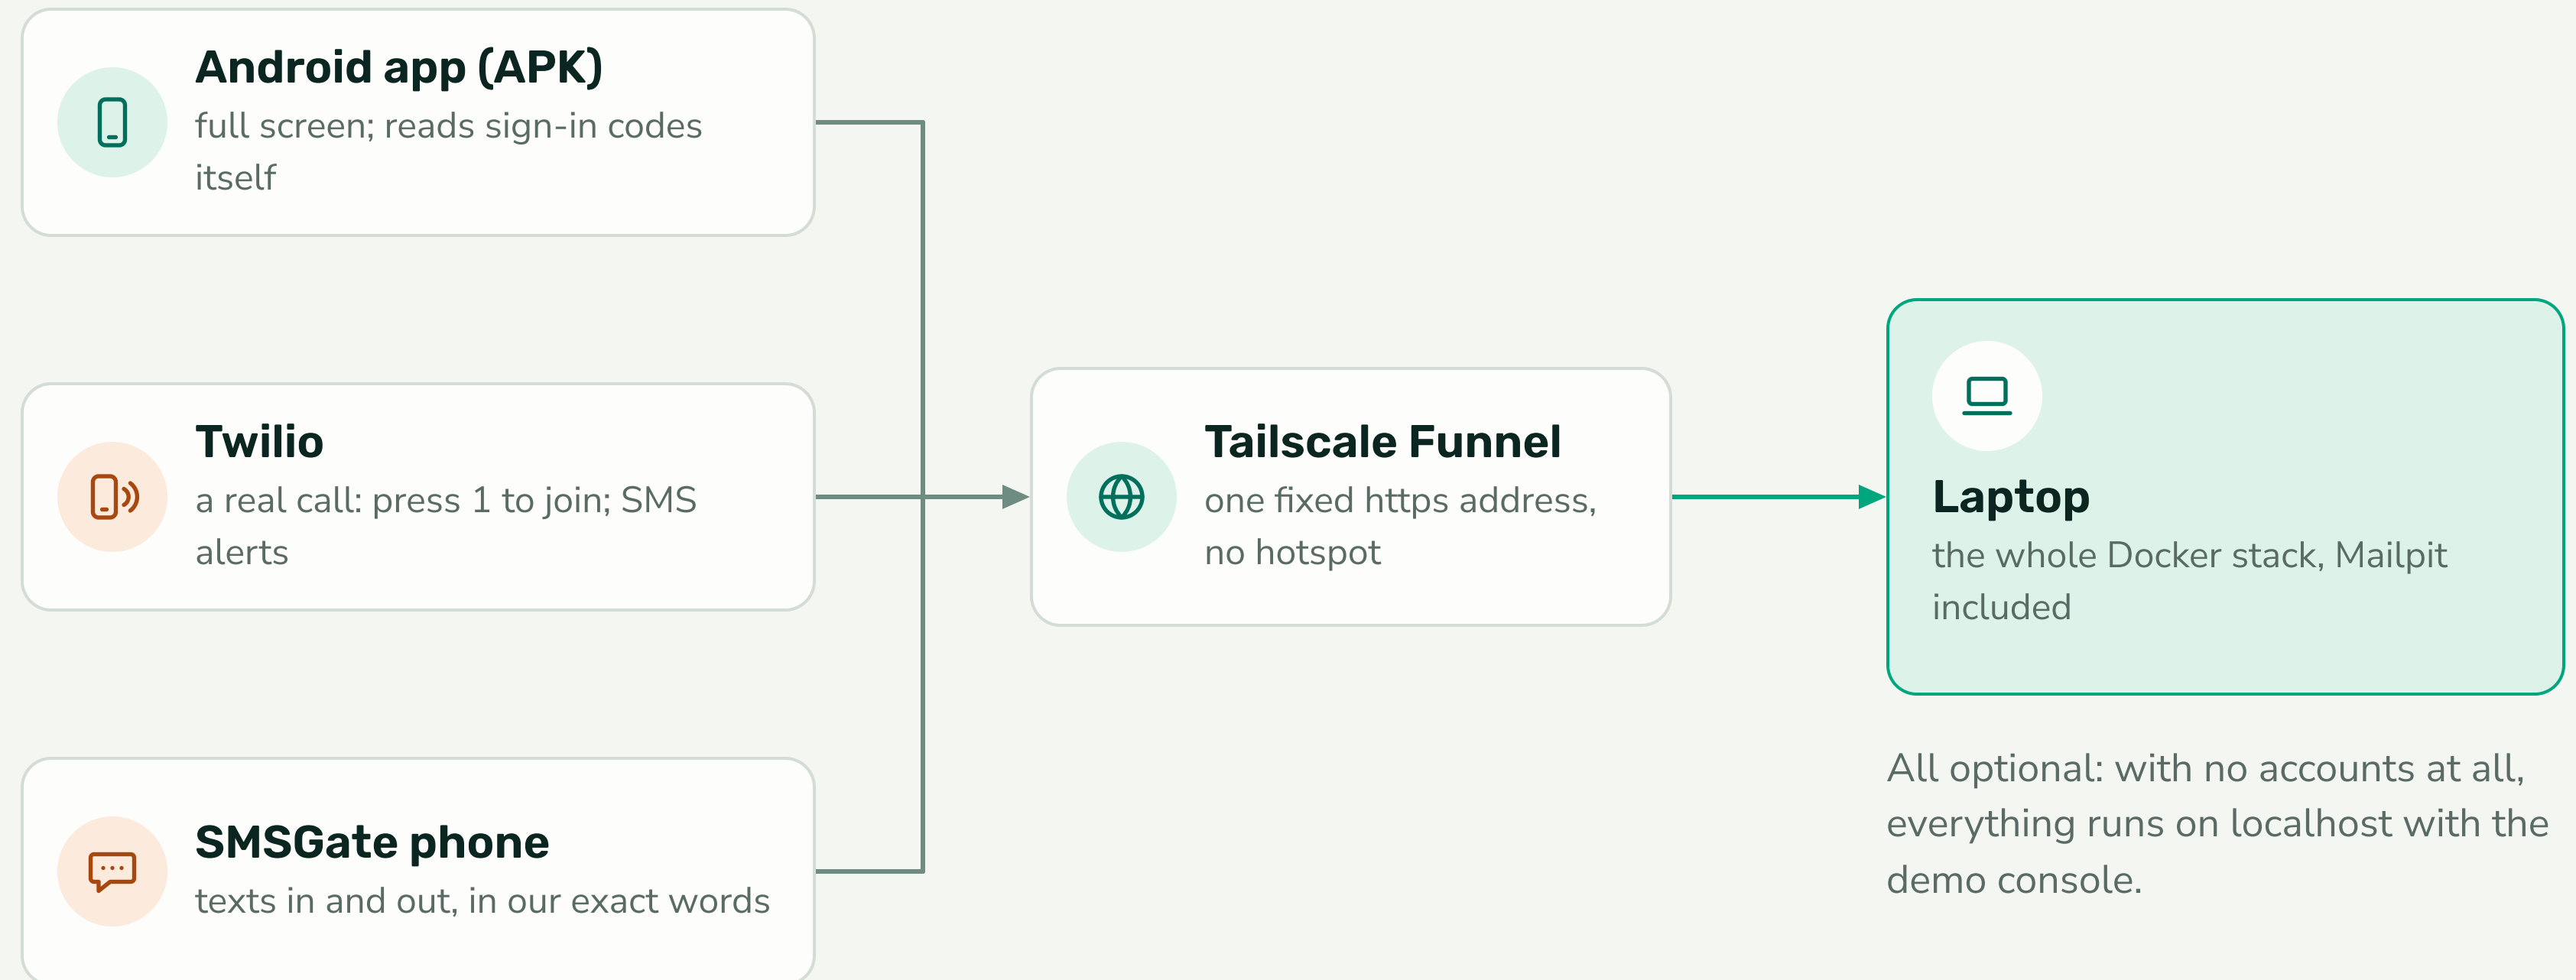

QUALITY

Tested like a product

BEYOND LOCALHOST

Real calls, real texts, a real app

TRY IT

Two commands

```
$ git clone https://github.com/Ashish000011/Phonemail.git
$ cd Phonemail && docker compose up -d
# then open http://localhost:8080
```

README.md

Quick start, the demo story, every feature.

docs/

Architecture, security, 87 design decisions.

docs/demo

A phone walkthrough and a clone-and-run video.

Thank you.
